

**F**ucking can be hot fun, but there are risks. There are many germs and viruses you can catch from someone during sex. Condoms guard against most sexual diseases, like syphilis, the clap, hep B or AIDS. These diseases can make you very sick and even kill you. But it's up to you to decide what chances to take. If you are fucking without a rubber for whatever reason, you can still reduce the risk.

#### **Fucking with no condom?**

- **Don't be rude: Pull out to shoot.**
- **Keep your dick slick.**
- **Stop if you see blood.**

#### **Getting fucked with no condom?**

- **Tell him: Don't cum in me.**
- **Avoid dicks with sores.**

Your ass absorbs things into your bloodstream **very** easily. Cum up the butt is **very risky** for catching sexual diseases, especially AIDS.

If you are fucking without condoms, you might want to get tested for sexual diseases (STDs) every 3 to 6 months. Consider getting the hep B vaccine — you can get shots for free from any STD clinic.

**Remember, using condoms is the best way to guard against most sexual diseases.**
